

Still paying to ship air?

Every year, manufacturers waste millions transporting empty PET bottles. FlexBlow TOTAL puts that profit back inside your factory.

Why It's a Game Changer

No headaches

- Automated bottle quality control
- Preventive maintenance built in

Financial benefits

- Zero transport costs
- €430M already saved for companies like yours

Sustainability benefits

- No CO₂ wasted on moving empty bottles
- Transparent sustainability reporting (CO₂, material usage)

Built for resilience

- 6-year unlimited warranty
- Remote diagnostics + spare parts on demand
- Monthly performance reviews (scrap rate, energy, efficiency)

The bottles you need

- From 50ml to 6L, necks from 18–55mm
- Format changeover in 10–20 minutes
- Custom-engineered preforms with low minimums (from 500,000/year)

FlexBlow clients have already saved
€430M by moving away from outsourcing.

Success Stories

English Mountain Spring Water (USA)

Cut transport costs, improved packaging quality, and reduced CO₂.

Maustaja (Finland)

In-house blowmolding brought us CO₂ and plastic savings, design flexibility, and cost efficiency. A real step forward for both our business and sustainability goals.

manufactured in-house

100%

green-energy
plant

170+

employees, strong
R&D investment

Meet Your Contact

"I work with manufacturers like you to benchmark hidden costs and explore if in-house PET fits. My role is to give you the numbers — so you can decide with confidence."
